DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language..

2. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Tanaka (US 6,587,141).

For claim 1, Tanaka discloses a TV lens system (Figure 1) wherein an optical member (Figure 1, Element 40) driven with a motor (Figure 1, Element 6) in a TV lens apparatus is controlled in accordance with one characteristic (Figure 6; Abstract; Column 4, Lines 10-44) selected from characteristics of a plurality of types (Abstract; Column 4, Lines 10-44), the TV lens system comprising: a selecting device (Figure 9, Elements 8 and 12) which selects the one characteristic from the characteristics of the plurality of types; and a changing device (Abstract) which changes at least one of the characteristics of the plurality of types selectable by the selecting device to another characteristic (Figure 9, Element 5).

Tanaka teaches a device that that selects the zooming or focusing characteristic and depending on the selection, performs a different operation on the optical member within the unit.

Art Unit: 2615

For claim 2, Tanaka discloses all the previous limitations and also wherein the characteristics of the plurality of types are related to control of a moving speed of a zoom lens with respect to an operational amount of an operating member (Column 4, Lines 10-44).

For claim 3, Tanaka discloses all the previous limitations, further comprising a zoom controller connected to the TV lens apparatus, the zoom controller having the operating member, wherein: the moving speed of the zoom lens is controlled in accordance with the operational amount of the operating member of the zoom controller; prepared characteristics are stored beforehand in a memory of one of the TV lens apparatus and the zoom controller; and the changing device selects at least one of the characteristics of the plurality of types selectable by the selecting device from the prepared characteristics stored in the memory (Column 3, Line 40 through Column 5, Line 5).

For claim 4, Tanaka discloses all the previous limitations and also wherein the changing device changes at least one of the characteristics of the plurality of types selectable by the selecting device to another characteristic by means of a computer connected with the TV lens apparatus (Figure 1; Element 50).

For claim 5, Tanaka discloses all the previous limitations and also wherein another characteristic is generated by the computer (Figure 1, Element 50).

For claim 6, Tanaka discloses TV lens system, wherein: a computer (Figure 5) is connectable with a TV lens apparatus (Figure 1, Element 40); a characteristic with respect to control of an optical member driven with a motor (Figure 1, Element 7) in the TV lens apparatus is set by the computer; and the TV lens system instructs to the TV lens apparatus to control the
